

**Table 2****Policies and Procedures in Chino Hills State Park's Wildfire Management Plan Compared to Selected Guidance From State Parks Headquarters**

| SOURCE         | GUIDANCE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | PARK'S WILDFIRE MANAGEMENT PLAN                                                                                                                                                                                                                                                                                                                                                                                                                          | ALIGNMENT |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| State Parks HQ | <p>Include a wildfire compartments section describing the different wildfire compartments of the park, which should be identified by topography, major vegetation types, rivers, roads, trails, and other features that naturally break up the landscape. The compartment descriptions should include:</p> <ul style="list-style-type: none"> <li>• The specific fuel, topography, and special weather considerations that may impact fire behavior.</li> <li>• Ingress/egress routes, gates, and critical access points.</li> <li>• Critical road features.</li> <li>• The location of all water sources.</li> <li>• The location and size of all pre-determined dozer lines, safety zones, and temporary refuge areas.</li> <li>• Critical park infrastructure/facilities and wildland urban interfaces.</li> <li>• Known hazards.</li> <li>• A description in detail of all sensitive natural and cultural resources and any required avoidance or mitigation measures that may impact fire suppression tactics.</li> </ul> | The park's plan includes a description of five compartments at the park that generally aligns with the content recommended by the template. However, the compartment descriptions do not identify fuel, topography, or special weather considerations that may impact fire behavior.                                                                                                                                                                     | ✓         |
|                | <ul style="list-style-type: none"> <li>• Include a wildfire preparedness section describing the wildfire preparedness goals and objectives for the park.</li> <li>• This section can introduce measures taken to address wildfire preparedness, the approximate number of fire-trained staff, and fire equipment available.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | The park's plan does not include a wildfire preparedness section or the associated content recommended by the template.                                                                                                                                                                                                                                                                                                                                  | X         |
|                | <p>Include a wildfire prevention section describing the wildfire prevention measures undertaken for the park unit including:</p> <ul style="list-style-type: none"> <li>• Public information techniques.</li> <li>• Structure hardening.</li> <li>• Defensible space efforts.</li> <li>• Wildland fuel reduction techniques.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | The park's plan describes multiple public information techniques using educational materials and talks to reduce human-caused ignitions. The plan describes one structure hardening and two defensible space measures that are generally consistent with the structure hardening and defensible space provisions contained in state law. The plan does not discuss any wildland fuel reduction techniques.                                               | ✓         |
|                | <ul style="list-style-type: none"> <li>• Include a wildland urban interface and non-State Parks structures section describing wildland fire mitigations that apply to the Wildland-Urban Interface and non-State Parks habitable buildings adjacent to park property.</li> <li>• This section should also include a description of the vegetation types and fuel loading along park boundaries.</li> <li>• This section should also note specific hazards as they relate to the wildland urban interface and include them on internal park maps.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Beyond noting that State Parks' position is that each landowner is responsible for the protection of their own structures through mitigation principally on their own land and that the permit program is only available if mitigations on the owner's property have proven inadequate, the park's plan does not include a section on the wildland urban interface and non-State Parks structures or the associated content recommended by the template. | X         |
